Caring Control for Pets and Wildlife

DEER OFF®

Patented Dual Deterrent System™ provides odor and taste barriers to repel deer, rabbits, tree squirrels, and other animals from browsing and feeding upon flowers, grass, bulbs, shrubs, plants, seedlings, and trees. Weather-resistant formula provides effective control. Reapply **DEER-OFF®** Deer Repellent Concentrate every 2 to 3 months or more often during periods when rain occurs.

Treats up to 4,000 ornamental shrubs four feet tall or approximately 40,000 sq. ft. or twice as much area for a periphery spray, depending on surface conditions, density and size of plantings.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions

This product may be used to repel deer, rabbits, tree squirrels, and other animals that feed on flowers, grass, bulbs, shrubs, plants, seedlings, and trees. **DEER-OFF®** discourages animals from feeding on bulbs dipped in concentrate formulation for 5 minutes and allowed to dry. Do not apply at temperatures below 40° F, or in wet, windy conditions.

IMPORTANT: Not for direct use on plants intended for human consumption (i.e. food plants.) This product contains egg solids which may cause allergic reactions in some individuals. Do not allow spray to drift onto plants intended for human consumption.

Mixing and Dilution Directions

Shake container of **DEER-OFF®** concentrate thoroughly prior to mixing. Mix concentrate with tap water at a ratio of 1 part concentrate to 7 parts water.

Use 4 oz. of concentrate and 28 oz. of water to make 1 quart (32 oz.) of spray mixture. Contents of 2.5 gallon bottle makes 20 gallons of spray when mixed with 17.5 gallons of water.

DO NOT OVER DILUTE THIS PRODUCT.

* Reapply **DEER-OFF®** Deer Repellent Concentrate every 2 to 3 months or more often during periods when rain occurs.

Application Directions

Shake container of **DEER-OFF®** spray thoroughly before use. Spray leaves, stems and branches thoroughly from all angles, until run-off or leaves look wet. Treat vulnerable plants at the beginning of each damage season. Repeat as new growth emerges, and if the effects of the previous treatment appear to be waning. Clean sprayer after each application to prevent clogging.

2.5 gallons of **DEER-OFF®** concentrate yields enough spray to treat up to 4,000 ornamental shrubs 4 ft. tall or an area of about 1 acre (40,000 sq. ft.) of treated plants. Surface conditions and size of plantings will affect the size of the area that can be treated with a given quantity of spray. Before large-scale treatments, test product on a small area of each type of plant to be treated to make sure that **DEER-OFF®** will not damage the plant.

Storage and Disposal

Do not contaminate water; food, or feed by storage or disposal. **Storage:** Store only in original container in a cool, dry area. Keep away from children and pets. Protect from heat and freezing. Store between 40° F and 90° F. Keep container tightly closed to prevent spillage and evaporation. If spillage occurs, dilute with water and flush away.

DISPOSAL: If empty- NONREFILLABLE CONTAINER. DO NOT REFILL OR REUSE THIS CONTAINER. Place in trash or offer for recycling if available. **If partly filled-** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Precautionary Statements

Hazards to Humans and Domestic Animals:

CAUTION: Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. In case of contact, wash thoroughly with soap and water after handling.

First Aid

If in Eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. Contact 1-800-858-7378 for emergency medical treatment advice.

Environmental Hazards

Do not apply directly to water or to areas where surface water is present, or to intertidal areas below the mean high water mark. Keep out of lakes, streams and ponds. Do not contaminate water by equipment cleaning or waste disposal.
