DIRECTIONS FOR USE

For optimum results, apply **Cycle™** at the first signs of drought stress or before signs appear. While watering after application is not required, irrigation will improve performance by moving the product into the soil profile. If grass cutting is performed prior to irrigation, do not remove clippings as much of the product may still be on the leaves. During high temperatures and severe turf stress the following precautionary measures are highly recommended: pre-wet the leaf blades before application and water in immediately after application to ensure product performance and safety.

APPLICATION RATES/INTERVALS

Monthly applications: Apply **Cycle™** at a rate of 4 ounces in a minimum of 2 gallons of water per 1000 square feet.

2 week applications: First apply **Cycle™** at a rate of 4 ounces in a minimum of 2 gallons of water per 1000 square feet. Then apply **Cycle** at a rate of 2 ounces in a minimum of 2 gallons of water per 1000 square feet every 2 weeks thereafter.

Repeat applications until drought stress conditions cease in order to prevent symptoms from returning.

MIXING INSTRUCTIONS

If **Cycle™** is mixed with other chemicals such as pesticides, always follow label instructions on the product with which **Cycle™** is being mixed. A jar test should be performed in order to ensure compatibility. Apply some of the jar test mixture to a small turf area and observe the turf area for safety.

ORDER OF ADDITION: (Mix vigorously during all additions)

- 1) Part or all of water.
- 2) Wettable powders and then dry flowables.
- 3) Adjuvants such as defoamer and buffer compounds.
- 4) Liquids and Soluble products.
- 5) Emulsifiable Concentrates.
- 6) **Cycle™** and other surfactants.
- 7) Top off with water to desired tank volume.

STORAGE, HANDLING AND DISPOSAL

Store in a cool, dry place in original container. Do not add water to container. Store away from extreme heat, fire, flame or sources of ignition. This product is best stored and handled between 40°F (4°C) and 90°F (32°C). If product freezes, allow to warm until free-flowing and shake. When empty, triple rinse container and pour rinsate into storage or mix tank. Dispose of the container according to all federal, state and local laws and regulations.
