

Now with Calcium Magnesium Acetate (CMA)

Provides fast and powerful results to -15° F

Quad SELECT

Proven 4-way premium blend.

The proprietary granular formula in Quad Select uses the power of calcium, magnesium, sodium and potassium chloride to provide superior results under extreme weather conditions and helps prevent re-freezing.

- Melts to -15° degrees Fahrenheit
- Granular formula spray coated with magnesium and CMA
- Water-based, non-staining indicator dye for coverage control
- Works on concrete, asphalt, brick and wood surfaces
- Uniform particle size provides consistent, accurate application
