

Turf Mark® Blue

Blue Spray Indicator for Turf Use

GENERAL DESCRIPTION

Turf Mark Blue® spray indicator is a natural-looking, temporary colorant that shows exactly where application has occurred. The highly visible color helps prevent skips, overlaps, and helps point and minimize drift, leaving turf looking lush and healthy after treatment. Turf Mark Blue is safe, non-toxic, and won't harm people, animals, or the environment.

TERMITICIDE PRETREATMENT APPLICATION

Turf Mark Blue will assist pest control technicians in applying structural pesticides by marking treated areas blue. Turf Mark Blue will indicate treatments on soil, wood, fibrous material and other areas. The colorant will help to eliminate damaging or wasteful overlap and reduce problem skips in application. Turf Mark Blue washes off most surfaces with soap and water. This product may stain certain surfaces in pretreatment applications.

DIRECTIONS FOR USE

Flat fan spraying tips are recommended when applying Turf Mark Blue. Increased volumes of spray solution should be used when Turf Mark Blue is applied to hard-to-mark areas. Longer or thinner stands of turf or sod may be more difficult to mark due to the non-uniform marking surface. Increasing the total volume of spray solution applied to those areas should reduce marking difficulty.

Experimentation with the volume of spray solution and rate of Turf Mark Blue applied per acre or area should allow each applicator to establish a rate that is functional and economical for each application. The more Turf Mark Blue you use, the darker your spray pattern.

This product is non-toxic under OSHA standard 29 CFR 1910.1200 and SARA Title III. This product contains no chromium or other inert metals which are listed as inert hazards by California Proposition 65 or other regulatory guidelines.

RECOMMENDED RATES

Liquid Suggested Rates

per 100 gal. (380 L) solution

APPLICATION AREA	DORMANT	LIGHT	DARK
Greens, Tees	6-8 oz. (175-240 ml)	6-10 oz. (175-300 ml)	10-14 oz. (300-415 ml)
