### Post-Emergent Herbicide

Dual powered post-emergent herbicide for tough broadleaf weed problems in established cool and warm season non-residential turfgrass. A single application delivers eight to 12 weeks of truly reliable control of dandelion, oxalis, clover and other difficult to control weeds.

- ▶ Dynamic combination of triclopyr and clopyralid provides to the root control of 35 broadleaf weed species
- ▶ A single application provides long-lasting, broad-spectrum control that helps eliminate repeat treatments
- ▶ Labeled for use on a wide variety of cool and warm season turfgrass with a low-odor formulation that's excellent for commercial and public applications

<b>Formulation</b>	A non-phenoxy post-emergent liquid
<b>Active Ingredient</b>	Triclopyr and Clopyralid
<b>Competitive Brand</b>	Dow AgroSciences Confront®
<b>Packaging</b>	4 x 1 gallon bottles
<b>Application Rates</b>	See label for specific uses and rates
<b>Mode of Action</b>	Post-emergence selective systemic broadleaf herbicide which controls target weeds by mimicking the plant hormone auxin causing uncontrolled plant growth.
<b>Signal Word</b>	Danger

#### Long-lasting post-emergent control of 35 tough-to-control broadleaf weeds, including:

Chickweed  
Clover  
Dandelion  
Narrowleaf Plantain  
Oxalis
