

# SUDDEN IMPACT

KENTUCKY BLUEGRASS

## Dark Green Genetic Color

5★ = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

- ✓ Exceptional density and summer persistence that naturally resists weeds
- ✓ Elite “Jacklin” turf quality - dark green genetic color, beautiful texture
- ✓ Exhibits good overall resistance to many common turf diseases

★★★★★	Close Mowing	★★★★	Summer Patch
★★★★★	Traffic Tolerance	★★★★	Stem Rust
★★★★★	Turf Density	★★★★	Dollar Spot
★★★	Spring Greenup	★★★★★	Genetic Color

**Sudden Impact** is an elite Kentucky bluegrass in the Jacklin line-up and provides exceptionally high quality turf at fairway mowing heights of 0.5 in. (1.3 cm) to homeowner mowing heights of 3 in. (7.6 cm).

**Elite Turf Performance:** Widely adapted to full sun and light shade with coast to coast adaptation, **Sudden Impact** makes a pleasing “impact” with its very dark green color and beautiful turf texture. **Sudden Impact** is an ideal choice by itself or as a component for blending with other elite Jacklin bluegrasses or mixing with top performing Jacklin perennial ryegrasses, fine fescues, and turf-type tall fescue.

**Fairway Tough:** With very strong establishment traits, **Sudden Impact’s** excellent NTEP performance for density, traffic tolerance, and tolerance to fairway mowing heights shows great playability without having to sacrifice turf quality.

**Superior Turf Density:** Exceptional year ‘round density and strong summer persistence gives **Sudden Impact** natural resistance to the establishment of weeds.

**Improved Spring Performance:** Exhibiting good spring green-up and very little seedhead development, **Sudden Impact** will make a big difference in the spring quality of your bluegrass turf when used for homes, sports fields, sod production or golf courses.

**Disease Resistance:** NTEP data indicates very good overall disease resistance for **Sudden Impact**. It exhibited resistance to summer patch and stem rust, with improved resistance to dollar spot and leaf spot.

**Seeding Rate:** 2-3 lbs./1000 ft<sup>2</sup> (10-15 g/m<sup>2</sup>) by itself or blended with other bluegrasses. Mix **Sudden Impact** with 20% ryegrass or 80% tall fescue.
