

Lebanon Control Products

Lebanon Treflan 5G Biodac

Description:

Treflan is a versatile preemergent herbicide that can prevent the germination and growth of a wide variety of weeds in and around labeled tolerant plant material. Treflan prevents most annual grassy weeds. Treflan is also labeled for control of some broadleaf weeds. Treflan can be used for many sites in residential, commercial, and industrial landscapes. Weed prevention in and around ornamentals, flower gardens, and other mulched areas are typical landscape applications. Lebanon Treflan 5G Biodac formulated on a premium dust free recycled paper carrier. This allows easy application using a variety of equipment. Treflan is a cost effective alternative to hand removal of unwanted weeds or repeated application of postemergent herbicides.

Type: Granular Preemergent Herbicide

Active

Ingredient: Trifluralin 5%
a,a,a-trifluoro-2,6 dinitro N-N dinitro-p-toluidiene
