

TURFACE ATHLETICS™

Pro League® Infield Conditioners

BETTER COLORS • BETTER PERFORMANCE

The #1 Conditioner for Safe & Playable Fields

Pro League Heritage Red™
An appealing and rich cherrywood color, whether it is wet or dry.

NEW TO THE LEAGUE!

Pro League® Champion Brown™
A unique, deep, dark color for a first-class look and provides excellent ball visibility.

Pro League® Red
This classic color is a popular choice to enhance infield appearance.

Pro League® Natural
Non-dyed conditioner delivers exceptional performance and a classic look.

Surface® Pro League® Conditioners

YOUR HOME FIELD ADVANTAGE

Playability. Safety. Confidence.

More than any other infield conditioner, Surface® Pro League® gives athletes at every level of play the opportunity to safely and confidently compete. The smaller, uniform particle size creates a consistent infield surface to minimize injuries from bad hops. The particles also provide a cushion for

sliding or diving. These porous particles also absorb moisture, preventing rainouts. With a choice of colors to enhance aesthetics and improve ball visibility, it is easy to see how Pro League gives you every advantage to bring home a safer, more playable field.

Stepping up to the plate

Improved manufacturing process enhances consistency and color.

Surface Athletics™ has raised the standard for quality once again, completing a major plant expansion recently. Now Pro League particles absorb standing water and resist compaction even better. Each particle also retains its color longer, without fading or degrading from exposure to the sun and on-the-field play. These improvements make it that much easier for you to manage moisture and maintain the safety and appearance of your infield.

The advantages of calcined clay—the inside story.

Inside each bag of Pro League are Turface® calcined clay particles. Compared to vitrified clay, shale or brick dust, these particles are proven to be the most effective for managing moisture and improving drainage on skinned infields. Their degradation is also just 3% over 20 years—far superior to other conditioners that break down or melt back down to clay in a few days.

Here's how the particles work to prevent your field from becoming oversaturated and slick, or dried out and hard.

Each calcined clay particle is like a tiny sponge, full of absorbent pores, and capable of absorbing its weight in water.

When it rains, excess water is wicked away from the infield clay and absorbed inside the particle, helping to eliminate rainouts.

When the particle reaches "field capacity" or can't hold any more water, it allows the excess water to drain even faster than sand.

As the field begins to dry, particles gradually release stored moisture back into the infield mix, extending ideal moisture levels.

Elevate the appearance and playability of your sports field with Pro League colors.

The four colors in the Pro League lineup give you options to create a playing surface that is uniquely yours. These examples show how a single color can enhance a ballpark's appearance, and how the use of multiple colors can create a one-of-a-kind look.

Georgia Tech, home of the Yellow Jackets, chose Pro League Champion Brown to give its ball field a new and distinct look.

This unique checkerboard pattern was featured at the Little League Softball World Series at Alpenrose field in Portland, Oregon.

Host facility Wooster High School has the mound ready for the Nevada High School Division One Championship Game.

ADDITIONAL TURFACE PRODUCTS
Keep your field in top playing condition.

TURFACE MOUND CLAY®

No areas around the diamond receive more constant wear than the pitcher's mound, batter's boxes and catcher's area. Make sure they are built and properly maintained using the best clays and blocks in the industry to assure on-the-field safety and playability.

Available in red or gray

MoundMaster® Blocks

Professional Mound Clay®

MoundMaster® Blocks

Professional Gumbo Mound Clay®

Turface® All-Purpose Clay®

EDUCATIONAL RESOURCES FROM TURFACE ATHLETICS™

KEEP YOUR FIELD IN TOP PLAYING CONDITION

Whether you're a professional groundskeeper, a volunteer coach, or parent, you can find a wealth of information, including instructional videos, field schematics and industry links online: turface.com/education. There are also listings for upcoming events and industry shows you can attend to get advice from top field maintenance personnel.
