

# KENTUCKY BLUEGRASS

**BLUE COAT** is an improved variety that incorporates the most recent advances in breeding technology to offer dense, fine leaf turf with dark green color and superior disease resistance.

**BLUE COAT** has exhibited high resistance to rust and summer patch. It also provides a dark green color, fine to medium leaf texture and excellent density during the growing season. The ability to handle heavy traffic makes **BLUE COAT** an ideal choice for sod production, sports fields, parks and golf course fairways, tees and roughs. **BLUE COAT** mixes well with other Kentucky bluegrass, perennial ryegrass, tall fescue and fine fescue.

## FACTS:

- Excellent density during the growing season
- Dark green color
- High disease resistance
- Fine to medium leaf texture
- Excellent wear Tolerance

## APPLICATIONS:

- Residential Lawns
- Sports Fields
- Golf Courses

## SEEDING RATES:

- New Establishment:  
3-4 LBS/1000 sq. ft.
  - Overseeding:  
1-2 LBS/1000 sq. ft.
- Estimated Seeds per Pound:  
1,300,000
